Supplementary Figure S9. Correlation between barcode compositions in Traditiom samples. Ranked correlation between barcode composition in 3 POTs (pre-treatment) and 20 time zero (T₀) replicates (upper triangle: correlation plots; diagonal: sample names; lower triangle: significance values from Spearman correlation test). AI1-10 T₀ reflect Hyperflask seeding in −E2 flasks. TAM 1-10 T₀ reflect seeding in TAM Hyperflasks (Technical problems effected the analysis of two samples -AI5 and AI6-).
